Backend : Node.js, Express.js, MongoDB

Tools : Git, GitHub, Vercel, VS Code, npm, Netlify, Canva, Figma, REST API

PROJECTS

TutorHive — Tutor Booking System

[Live Demo](#) | [GitHub](#)

A full-stack tutoring platform that connects students with qualified tutors, enabling tutor discovery, session booking, flexible scheduling, and personalized learning management.

Key Features

- Developed tutor browsing and booking functionality with subject, expertise, and availability-based tutor discovery.
- Implemented role-based functionality for students and tutors, including session management and personalized learning workflows.
- Integrated secure authentication and user management with responsive dashboards and profile management.
- Built a fully responsive interface with modern UI components for seamless use across desktop, tablet, and mobile devices.

Technologies

Next.js/React.js · Tailwind CSS · Node.js · Express.js · MongoDB · Firebase · JWT · Axios

Ticketora — Online Ticket Booking Platform

[Live Demo](#) | [GitHub](#)

A full-stack online ticket booking platform that enables users to discover and book bus, train, and flight tickets through a streamlined digital booking experience.

Key Features

- Developed a complete ticket booking workflow with ticket browsing, booking management, cancellation, and booking status tracking.
- Implemented role-based functionality for Users, Vendors, and Admins to manage bookings, tickets, and platform operations.

- Integrated Stripe Checkout for secure online ticket payments with payment status and transaction tracking.
- Built vendor ticket management features for creating, updating, approving, and managing available tickets.
- Implemented protected authentication and user session management with role-based access control.
- Designed a fully responsive interface optimized for desktop, tablet, and mobile devices.

Technologies

Next.js · React.js · Tailwind CSS · Node.js · Express.js · MongoDB · Better Auth · Stripe · Axios · REST API · Vercel
